

## Full Stack Web Developer, UI/UX Developer Job Description

MONQ, a dynamic company, is seeking a highly technical, design capable, Full Stack Web Developer. We are focused on bringing a new level of energy and productivity to our website, and ensuring our website is consistent, on-brand, and highly user-friendly. The candidate will have multiple years of JavaScript, HTML, CSS, PHP experience, coupled with familiarity with WordPress and WooCommerce. Hands-on experience working in B2C e-Commerce space is big plus! The major issues at this time are:

- The site [www.MONQ.com](http://www.MONQ.com) is slower than we would like, and
- Our ability to make even modest modifications, such as new landing pages, is constrained by 5 years of development on the platform.

We are seeking a self-motivated and driven developer, who is able to work both independently and in collaboration with our existing developers.

### Duties:

- Gain an overall understanding of the current suite of our web applications, including the UI and web services components.
- Ensure the technical feasibility of UI/UX designs.
- Develop new user-facing features.
- Implement increased speed for both desktop and mobile devices.
- Write and perform unit and other tests to ensure the quality of code.
- Optimize applications for maximum speed and scalability.
- Support of and collaboration with current developers.
- Collaborate with Brand Strategists to produce easily modifiable outward-facing web page content.

### Skills Needed

- At least 4 years experience in front-end and back-end PHP web development
- HTML, CSS, JavaScript
- Extensive knowledge of WordPress and WooCommerce
- Experience with version control systems
- Familiarity with SEO and Web Analytics best practices
- Responsive Web Development Experience
- Working knowledge of cross-browser development techniques
- Good knowledge of software engineering life cycle process, including design, development, build/release, testing, Git source control, ticketing, and QA.
- Excellent analytical and problem-solving skills.
- Ability to absorb information quickly, complete jobs quickly and accurately, and the ability to multi-task in a fast-paced environment.

### Education

- Degree in Computer Science or equivalent work experience.
